Temperature Monitoring Device Instructions

Instructions for Q-tag CLm doc Device for Shipping at Ambient or Refrigerated Conditions:

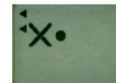

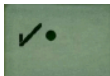

- 1) Stop the device. Break off the plastic cover on the side of the device by bending it up and down. If this action does not concurrently snap off the small tab indicated by the words "break to stop" with the arrow pointing towards it then also snap off this tab.
- 2) The "Checkmark" Symbol indicates there was no temperature excursion recorded by the device.

- 3) The "X" Symbol indicates there was an ALARM triggered by a temperature excursion event.
- 4) Download the temperature monitoring data and email the file to Shipping-CD@cambrex.com

Instructions for Q-tag CLm doc D Device for Shipping at Frozen Conditions:

- 1) Stop the device by holding down the STOP button for at least 3 seconds.
- 2) The "Checkmark" Symbol indicates there was no temperature excursion recorded by the device.

- 3) The "X" Symbol indicates there was an ALARM triggered by a temperature excursion event.
- 4) Download the temperature monitoring data and email the file to Shipping-CD@cambrex.com

Instructions for Tive Solo 5G Tracker (any condition): Receiver does not need to stop Tive Temperature Monitors. Please return Tive Temperature Monitors to the address below:
